New HD Cameras Give Live Look at I-4 Construction

ORLANDO — Two new live high-definition I-4 Ultimate construction cameras are now available for viewing.

In January, cameras were placed at the Maitland Boulevard (State Road 414) and Interstate 4 (I-4) interchange, and at the Kirkman Road and I-4 interchange. View video streams from the new cameras at <http://fdot.tips/i4camera>, or by visiting the I-4 Ultimate website and clicking on “Florida 511 & Live Traffic.”

The Maitland camera, situated in the Southwest quadrant of the interchange, is tracking construction progress at the interchange and of the new pedestrian bridge, which construction is slated to begin this year.

The Kirkman camera is situated high above the International Drive area atop the SkyCoaster at Fun Spot America. It gives users a view of the interchange construction and the new Grand National Drive overpass.

The two cameras join the existing camera that monitors the State Road 408 and I-4 interchange construction in downtown Orlando.

The I-4 Ultimate project is rebuilding 21 miles of Interstate 4 (I-4) from west of Kirkman Road in Orange County to east of State Road 434 in Seminole County, adding two new dynamic tolled Express Lanes in each direction, replacing more than 140 bridges, reconfiguring 15 major interchanges and reconstructing the entire roadway. Learn more about the I-4 Ultimate project or sign up for advance construction alerts by email or text at www.i4Ultimate.com.

Questions? Please contact the Florida Department of Transportation (FDOT) Public Information Office, 386-943-5473 / jessica.ottaviano@dot.state.fl.us.

The FDOT urges all motorists to use caution near any road construction. Please slow down and stay alert when driving through work zones.
