Exit Point for WB I-4 Ramp to Conroy Rd Changing to a Half-Mile Sooner

Temporary Ramp System Between John Young Pkwy. and Conroy Rd. to Open March 5

Orlando – A new temporary ramp system that will combine traffic from the westbound I-4 on-ramp at John Young Parkway and the westbound I-4 exit ramp to Conroy Road is scheduled to open the morning of Tuesday, March 5.

The exit point for the westbound I-4 ramp to Conroy Road (Exit 78) will shift nearly a half-mile sooner. Traffic will exit westbound I-4 to a temporary two-lane ramp system.

The westbound I-4 entrance ramp from John Young Parkway will connect to the temporary ramp system. Motorists seeking to enter westbound I-4 from John Young Parkway will travel on the lengthened ramp for approximately one-half mile before merging with westbound I-4 traffic. Motorists must be prepared to merge onto westbound I-4 to avoid continuing to Conroy Road. View or download maps of this new temporary ramp system at: <https://fdot.tips/tempramp>

The temporary configuration is necessary to create a safe work space for construction crews to continue building the new westbound I-4 travel lanes. On the night of Monday, March 4, the westbound I-4 on-ramp from John Young Parkway and the exit ramp to Conroy Road will temporarily close to shift the ramps to the temporary ramp system. View or download a map of detour routes for these ramp closures at: <https://fdot.tips/rampdetours>

Modifications or extensions to these schedule may become necessary due to weather delays or other unforeseen conditions. Motorists are advised to maintain a safe speed when driving through the work zone.
